Description: Our group made this platform just to help the students find job placements. We used CSS, HTML and JavaScript to make it including backend with php and database with Mysql.
Tools/Tech: *HTML, CSS, JavaScript, Front-End, Back-end.*

Internships / Training

Organization Name – [Splinxify]
[June, 2024] – [July, 2024]

- During my internship at Splinxify, I gained hands-on experience in front-end web development, focusing on designing and building responsive websites using HTML, CSS, and JavaScript. I worked extensively with Visual Studio Code as the primary development environment, utilizing useful extensions such as Prettier for code formatting and Go Live for live previews.

The program included daily training sessions on front-end technologies, UI/UX design principles, and best coding practices. As a final project, I developed a personal portfolio website on a topic of my choice, showcasing the skills and techniques I learned throughout the internship.
